We believe that healthier **lifestyles can begin with simple everyday choices**, including the beverages people consume on a daily basis. However, many health-oriented beverages currently available in the market still present limitations in terms of accessibility, taste, and convenience for regular consumption. Even products such as Apple Cider Vinegar (ACV), despite their widely recognized benefits, are often not easily incorporated into everyday lifestyles.

Zolza was therefore developed with the aim of redefining this experience by making wellness-oriented beverages more approachable, enjoyable, and suitable for daily consumption. Our objective is to offer a beverage that not only delivers refreshment and great taste, but also seamlessly complements modern lifestyles.

To achieve this, we utilize premium Thai fruits sourced from local farmers, including mango, passion fruit, and pineapple, which are naturally fermented into Fruit Cider Vinegar (FCV). This process not only enhances the value of Thai agricultural produce, but also enables the development of a Sparkling Fruit Cider Vinegar ready-to-drink beverage that is refreshing, convenient, and easy to enjoy. To further enhance the drinking experience, Zolza is enriched with Fibruline™ and Vitamin B6, delivering more than just flavor and refreshment in every sip while supporting a balanced and modern lifestyle.

Fruit Cider Vinegar (FCV) is produced through a natural fruit fermentation process in which natural sugars from fruits are converted into alcohol and subsequently transformed into acetic acid, the key characteristic of cider vinegar. This process creates a balanced tangy flavor while preserving the distinctive aroma and taste of each fruit variety. By combining Thai tropical fruits such as mango, passion fruit, and pineapple with sparkling carbonation, Zolza deliver a refreshing and approachable beverage with a layered flavor profile. Through the unique character of Thai fruit-based FCV, Zolza transforms local fruits into a modern beverage designed for contemporary lifestyles.

*The Journey of **Cider Vinegar Drink***

Zolza is more than simply an alternative beverage; it represents a new generation of wellness -oriented drinks that combine refreshment, flavor, and thoughtfully selected ingredients in every can, while elevating Thai fruits into products that can be enjoyed as part of everyday life.

Mango

Sparkling Drink with Mango Cider Vinegar (Mango Flavored)

"Mango is a natural source of vitamin C, beta-carotene, and polyphenols, which are associated with antioxidant properties. Some of these compounds may remain after fermentation."

325 ml

Pineapple

Sparkling Pineapple Cider Vinegar Drink (Pineapple flavored)

"Pineapple is a natural source of vitamin C and polyphenols, which are associated with antioxidant properties, and offers a refreshing tart flavor profile. Some of these compounds may remain after fermentation."

325 ml

Passion Fruit & Mango

Sparkling Drink with Passion Fruit Vinegar (Passion Fruit and Mango Flavored)

"Passion fruit is a natural source of vitamin C, polyphenols, and flavonoids, all of which are associated with antioxidant properties, and is characterized by a rich, tangy flavor profile. Some of these compounds may remain after fermentation.."

325 ml

Zolza is more than just another flavored soda.
It is a Sparkling Fruit Cider Vinegar crafted from Thai fruits through natural fermentation – offering a new alternative beverage experience with distinctive ingredients, unique production methods, and functional wellness benefits.
